

SAFETY POLICY

QUERCETA, JULY 28th., 2014

PREMISE

Organize Safety means, besides undertaking actions in the respect of rules, facing the themes according to modern managing outlines.

The managing excellence presumes the optimization of safety and health conditions of the company that can be obtained by implementing the managing system for safety, the requirements of which are established by the international rule OHSAS 18001:2007.

In this context, Michielotto Service Srl declares, first of all, its firm intention in pursuing the implementation of a safety system in conformity with the rules recognized by the international standards.

Therefore it is company's will to face and solve problems resulting from the pursuing of this scope by adopting adequate operating means and creating a work environment suitable for the correct carrying out of activities and, above all, empowering in a coordinate way all the persons who work in the company.

MISSION

Find out and propose advanced and competitive solutions in the field of the proposed activities, based on continuous improvement of the quality of service as well as the Clients' satisfaction, in the complete respect of the rules that protect the workers' safety, by optimizing the utilization of resources and energy and reducing the risks on workers' health at working sites.

SAFETY POLICY

1. *Know and keep under control the safety aspects connected to carried out activities;*
2. *Find out the legal prescriptions and transpose them correctly and fully;*
3. *Establish and keep precise responsibilities in the safety field inside the company;*
4. *Adopt the necessary procedures to operate management of safety as well as the monitored risk factors;*
5. *Find out and satisfy the needs and the training obligations;*
6. *Aim to reduce risks inside the company, involving all interested parties;*
7. *Management's commitment for continuous improvement of aspects connected to safety and health at working sites by establishing targets and application programs;*
8. *Keep under control the correct functionality of the equipment and the machines used by the company;*
9. *Reduce the risk of casualties resulting from our actions, on professional illnesses and, in a particular way, on the accidents at works;*
10. *Management's commitment to define and diffuse, inside the company, the targets of HSE as well as the application programs.*
11. *Increase the knowledge and the conscience of safety from all the workers.*
12. *Involvement of workers, through the Safety Workers Delegate, with regards to health and safety at working sites.*

The Management
